

Microsoft Certified Database Administrator (MCDBA) for SQL Server 2000

The Microsoft® Certified Database Administrator credential is the premier certification for professionals who implement and administer Microsoft SQL Server™ databases. The certification is appropriate for individuals who derive physical database designs, develop logical data models, create physical databases, create data services by using Transact-SQL, manage and maintain databases, configure and manage security, monitor and optimize databases, and install and configure Microsoft SQL Server. Please use this chart to help develop your own MCSD plan!
